This report presents the results of a three year study which investigated the effects of New York State's strict drug law enacted in 1973. The analysis traces the impact of the law on narcotics use and drug-related crime. The process of implementing the law by the State's criminal justice system is also examined. This qualitative and quantitative analysis is one of the first of its kind undertaken to evaluate the results of a legislative program designed to combat crime. The report can be helpful to other states which are developing strategies to control illegal drug use and crime.

Price: \$4.00
